last 13 weeks of sales history
that's what sims uses to look at suggested order qty

Thanks

Is the weekly average based over an entire year or month?

Hi Kristine,

average weekly sales 36,200 equals 362 bottles per week

I have no idea where these stores are getting this type of volume

The last pharmacy I was manager at did about 525 rxs/day and we sold about 500 tabs a month (5 bottles)

Can you see if the system is up today to check the item movement for #3836?

I ran a query to see how many bottles we have sent to store #3836 and we have shipped them 3271 bottles between 12/1/10 and 1/10/11. I don't know how they can even house this many bottle to be honest. How do we go about checking the validity of these orders?

Re: High Quantity Stores 682971 [[Link](#)]

Hi Kristine

I am able to look at store item movement if this helps. You can contact the store for more information if necessary
These sales are quite high compared other non-Florida stores.

St 7298 sells about 22,000 tabs of 682971 every week
that translates to 220 bottles per week so 450 bottles is a little more than a 2 week supply.

St 3836 system was down

St 5018 sells about 13,500 tabs of 682971 every week
that translates to 135 bottles per week

Subject High Quantity Stores 682971

I have several stores that are ordering huge quantities of 682971 on a regular basis. This is creating an issue in maintaining enough 222 forms to fill all of the orders because a new 222 form is generated for every 128 bottles of this WIC that are ordered. For example, when they order 450 bottles, there will be 4 - 222 forms printed to accomodate this one item order.

I feel that the store needs to justify the large quantity.

Three stores that come to mind are #7298, #3836 and #5018.

What are your thoughts on this matter?
